METHOD OF USE
(Free Spirit Headset UL-8100 – Well-Being, Law 31 compliant)

Preparation & Alignment – Short Premium Version (before the methods)

To fully benefit from the Free Spirit Headset, a small preparation can transform the session into a deeply soothing and spiritually aligned moment.
The goal is simple: **create a clear, calm, and receptive inner space**.

Recommended preparation (at home or in a wellness center)

- Take a warm bath or a quick shower to release body tension.
  • Slightly air out the room to ensure good humidity and a feeling of fresh air.
  • Turn off distractions: phone, notifications, noise.
  • Sit or lie down in a stable position: lying, seated, or semi-reclined.
  • Place a light blanket if you like to feel enveloped.
  • Choose a simple intention: clarity, peace, grounding, reset.

Spiritual alignment (short version)

Sit or lie down.
Place your hands on your heart or simply alongside your body.
Take 3 deep breaths.
Imagine your head as an inner lighthouse gently lighting up.
Let the headset amplify this perception and guide your presence toward a clearer, more centered space.

Conscious breathing

- Inhale for 4 seconds
  • Pause for 2 seconds
  • Exhale for 6 seconds
  • Repeat 7 to 10 cycles

This breathing synchronizes perfectly with the vibrational modules and helps “empty the mind” — not by forcing, but by letting thoughts drift like clouds.

Mental clarity – mini-ritual

1. Close your eyes
2. Let the headset settle
3. Think of one single phrase:
   “I return to my center”
4. Observe your head becoming lighter
5. Let the modules create a clear inner space

For wellness centers

- Install the person with soft music or complete silence
  • Use the washable under-headsets between each client
  • Begin with guided breathing
  • Allow 3 to 5 minutes of integration at the end of the session
  • Always remind that this is a vibrational, non-medical tool (Law 31)

METHODS

1. Mental Clarity Method —

Place the modules around the forehead, temples, and upper skull.
Encourage slow breathing for a few minutes.
Users generally report a sensation of “mental clearing,” like fresh air entering the mind.
Ideal for clearing mental fog, starting a meditation, or preparing for creative focus.

2. Meridian Harmonization Method —

Arrange the modules in a complete circle around the head, forming a “vibrational crown.”
Remain still with eyes closed.
This method helps encourage a more fluid energetic flow and enhances the sensation of overall coherence.
Perfect for grounding, recalibrating, or inner balancing techniques.

3. Deep Relaxation Method —

Place the main module at the top of the head and distribute the others along the back of the skull.
This configuration gently releases accumulated tension and promotes deep unwinding.
Recommended before sleep, after long workdays, or during emotional overload.

4. Guided Meditation Method —

Align the modules along the central axis: *forehead ? top ? back of head*.
This creates a stable vertical energetic line that supports mindfulness and inner stillness.
Ideal for meditation teachers, breathwork, and introspective sessions.

5. Rapid Energetic Reset Method —

Position the modules freely based on intuition or momentary needs.
Sessions of 3–7 minutes can reset internal order, reduce agitation, and restore calm clarity.
Useful for transitions between tasks, grounding after stress, or quick recalibration.

6. Professional Vibrational Care Method —

For practitioners and wellness centers:
Create a vibrational crown around the head, then place one module beneath the head on a soft cushion.
This configuration enhances the receptivity of any energetic, vibrational or holistic care session.

7. Children / Hypersensitivity Method —

Use only 3 to 5 modules for a gentler vibrational flow.
Adapted for children, highly sensitive individuals or anyone new to vibrational tools.
Always supervise children during use.
Provides calmness, grounding, and soft energetic support.
