The Orgo-Life is created by the process of mixing polyester resin, crystals and metal. When the resin hardens, it shrinks and exerts pressure on the crystal. This pressure changes the polarity of the crystal creating a piezoelectric effect on the surrounding dirty/chaotic electromagnetic fields, electromagnetic frequencies. This effect harmonizes negative electromagnetic fields, or DOR, into positive electromagnetic fields (negative ions), or POR.

The Pyramids of Harmonization and Power

The Pyramid of Power and Manifestations

We have all marveled at the deep mystery of the Great Pyramids. And to this day, we still debate who built them and why. Are they portals, powerhouses or expanding consciousness? With many commonly accepted myths debunked, the enigma deepens even further.

If the pyramid's ability to focus energy can be recreated at the nanoscale, the researchers say the same science could be used to create more efficient sensors and solar cells.

The pyramid shape helps to neutralize any access to harmful waves for our health. It is for this reason that it is increasingly used by people who rightly or wrongly apprehend the "subtle energy attacks" of evil people. Installed near the pyramid, tools, food and living beings benefit from curious positive waves. When you are next to a Pyramid, it comforts you and reassures you if you fear being disturbed by people considered evil. This real calamity that generates

jealousy, nowadays wreaks havoc at all levels of the family, community and society. He spares no one and can go so far as to endanger each of us. Protecting yourself has therefore become a completely natural reflex.

The special power of the pyramid can be best felt when the pyramid is aligned with the magnetic north pole. Countless researchers around the world have found that the pyramid shape alone has some remarkable energy properties.

All of our Orgo-Life pyramids contain 5 quartz crystal points (UL-3470) or 9 depending on the model (UL-3479). These are placed at the tip of the pyramid, and at its base pointing in the 4 directions (UL-3470) or 8 directions of Feng Shui depending on the model (UL-3479). The natural tips of the crystals help create an energy field.

The pyramids therefore have a much stronger and more directed flow of energy and a wider radius of effect. Psychics and energy sensitive people will often observe a beam of energy coming out of the top of the pyramid - most people can feel this by waving their hand in the air above the pyramid and describing it as a feeling of warmth or tingling or pressure on the palm of the hand.

These Pyramids were created with the specific intentions of banishing negative energies and entities while cleansing home and person. The main intention is to bring harmony into all aspects of your life (the grounding). A pyramid functions as a transmitter to direct intention. By charging it with your thoughts, it will manifest and harmonize!

The UL-3470 and UL-3479 pyramids therefore have a much stronger and more directed flow of energy and a wider radius of effect. Psychics and energy sensitive people will often observe a beam of energy coming out of the top of the pyramid - most people can feel this by waving their hand in the air above the pyramid and describing it as a feeling of heat or tingling or pressure on the palm of the hand.

The special power of the pyramid can be best felt when the pyramid is aligned with the magnetic north pole. Countless researchers around the world have found that the pyramid shape alone has some remarkable energy properties.

Also known to repel negative energy and harmful electromagnetic waves. Our homes are a cesspool of harmful electromagnetic pollution from our phones, Wi-Fi, and other electrical devices. The Pyramid effectively absorbs and transmutes these waves into a productive and healing wavelength. This is one of the main advantages of this pyramid that attracts people! It

leaner water. Water that has rested near the pyramid will taste better (about 5 minutes) and is also healthier.

Purifies the atmosphere. Hence the popular practice of offering pyramids to areas affected by EMF pollution.

It is important that it cannot be plugged in all the time, because plugged in is meant to connect the beyond above, and unplugged will have more grounding effect. Example a connected week and a non-connected week can be a perfect routine or according to your feelings.

Many people have experienced instant relief with a simple pendant, although if you are very sensitive to EMF radiation you may need to place more pieces such as: your jewellery, sacred objects, letter, written intentions or other near your pyramid.

All of our Orgo-Life pyramids contain a minimum of 5 quartz crystal points. These are placed at the tip of the pyramid, and at its base pointing in the 4 directions. The natural tips of the crystals help create a much more powerful energy field.

The most powerful and aesthetically pleasing Orgo-Life pyramid for attunement and power you can get your hands on, period. This pyramid is designed to be closest to you and the ideal location is where you spend most of your time, in the bedroom under the bed/on the nightstand, on the work desk, in the studio, at home. workshop, in the meditation room, the treatment room or even in the room of a teenager/relative/friend who could benefit from a little help to evolve. The field of action of the Pyramid is 15 and 40 feet in passive mode and in active mode, i.e. several hundred meters.

WHY IT WORKS

Why it works, no one seems to be able to explain. Geometry, on the one hand, seems to be key - the mathematics embodied in the pyramid is quite complex, as if the pyramid itself was designed as a monumental crypt of occult science.

The value pi (3.14159...), the key to the ancient mathematical riddle of squaring the circle and cubing the sphere, is contained in the Great Pyramid as the ratio of altitude to circumference. Phi (1.618), a constant of nature, determining the proportion of limbs and trunk in plants and animals, is also present in the pyramid as the ratio of the height of a face to half the base. Phi is known to artists as the golden section and is the aesthetic proportion on which the architecture of the Greeks, ancient Egyptians and others was based. The ancient Egyptians saw it not simply as a number, but as a sacred symbol of the archetypal male force: the creative function of reproduction in an endless series.

The other key is to orient the pyramid towards the three main axes of etheric energy flow: 1) North-South with the magnetic field, 2) East-West with the rotation of the planet, and 3) Up-Down. with the gravitational field. Thus, the accumulation of energy is maximized with the level of the pyramid and its four faces perpendicular to the four directions.

Modern physics-mathematics has not yet admitted the existence of a universal ether, nor explained this phenomenon of energy accumulation, although some independent thinkers have made progress towards reconciling theory with reality. Pat Flanagan, a stoned doctorate. in physics is one such person, offering an explanation in his short and easy-to-read book, Pyramid Power. Believing that the Egyptians used concrete geometric computation rather than abstract arithmetic computation in their mathematics (due to its superior descriptive/predictive ability),

Flanagan offers a geometric approach to describing material reality. Arguing for the universal existence of the ether through experimental evidence, he conceives of it as the perfect hydromechanical system with virtually no internal resistance, and no "atomic oscillators" to prevent the passage of radiant energy. In his diagram, the universal field looks like this: gravity is a one-dimensional aether pressure, electricity is a two-dimensional aether current, and magnetism is a three-dimensional aether vortex. Moreover, he claims that the pyramid shape not only accumulates energy from the earth's magnetic field, but also from the gravitational field.

Eric McCuahan, electronics wizard, son of Marshall and also a pyramid shredder, claims that the pyramid creates a "homogeneous electromagnetic field" inside of it. He also demonstrated, as did Flanagan, that the pyramid radiates as an upwardly charged body as blue energy capable of turning Kodachrome film blue. The two investigators also report that the energy accumulation effect is heightened when the pyramid is alternately laminated with organic material and metal foil, the technique used by Wilhelm Reich to store this same energy in rectangular boxes called energy accumulators. Orgone.

And we at Orgo-Life have developed the 5G & EMF Quantum Equalizer Technology which allows us to further amplify the energy emanating from the pyramids.

Rotate it, inspect the sides, look below and enjoy all the details that only can be captured in real time.

Where do you need it most? This beautiful orgone piece can be placed in your home, office, workspace or even at your parents, lover or friend's house. You will be happy to observe the positive results such as feeling more relaxed, calm and open. Since it neutralizes the negative effect of electromagnetic frequencies and reorganizes chaotic energy fields, next to the wifi router, smart meter or near any electronic device are excellent positions for your pyramid. In the home or garden, you can see the visible effects with the increased growth of your plants and plants.

These pyramids are made with a minimum ratio of 40/60 resin/metals & stones.

**** All Orgo-Life are created in a positive and loving environment. Sage stained and charged in either Sun/Moon depending on the destination of each of our Orgo-Life units!

As with all handcrafted items using natural elements, variations in color, clarity, composition are to be expected.

Nothing is perfect... If it were, it wouldn't be handmade.
