A-14-888-Hz-8-Hz-Get-all-the-Abundance-With-the-pyramid-gate-wealthp-and-Prosperity-Endorphibne-release-with-meditation-2hrs.-33min

Release endorphins and remove all negative blockages that hinder you to access wealth and prosperity with this specially composed meditation music in the angel number and abundance frequencies of 888 Hz + 88 Hz + 8 Hz to help you attract infinite abundance.

The frequency of 888Hz is related to the Angel Number 888, which is an indicator of prosperity and abundance. If you've been seeing this number often recently, you might be receiving guidance on how you can attract that abundance while achieving your deeper spiritual purpose.

The Angel number 888 also can be seen as an assurance that you will achieve all your goals by following your heart. The 888 Hz Angel Number frequency can help you remove all negativity, which hinders you in accomplishing your goals, your dreams and desires, and thus open a gate of abundance, blessings and unlimited wealth - be it financial, spiritual or emotional.

The frequency of 8Hz is imperceptible to the human ear. It is an alpha frequency and occurs when we are awake, yet deeply relaxed. This state is also known as a "trance". Our attention is strongly directed towards inwards. It is believed that this frequency is the bridge between the conscious and the subconscious.

Alpha frequencies also occur before falling asleep and waking up. Due to the relaxed yet concentrated state, we are particularly receptive to remembering and learning in this phase.

Research has shown that 8Hz synchronizes the two hemispheres of the brain, releasing endorphins and causing the cells and neurons in the nervous system to regenerate. Each angelic number (or: "AN" for Angel Number) is linked to its corresponding angelic frequency. Each frequency exists with a purpose and can help you in different stages of your life. Whether you are feeling weak, uncertain or in need of strength to carry on with your current plans and projects, there is a different frequency that can help you.

Angel Number frequencies also help to engage more deeply in the mystery and wonder of existence. Understanding, that there is "Intelligence" much greater than ours at play and there is much more around us, than we are able to perceive and/or even imagine. The music in this video is an original 888 Hz, 88 Hz and 8 Hz frequency composition and has not been artificially tuned to the frequencies of 888Hz, 88Hz and 8Hz afterwards. I am convinced that, composing 888Hz + 88Hz + 8Hz music in its

original frequencies, will lead to better results when it comes to deploying the positive spiritual energy of these particular Angel Number and abundance frequencies.

As long as it is positive for you, it will be positive for your body and soul.

A-15-888-Hz-receiving-Infinite-Abundance-Loving-and-Blessings-from-all-Angels-Entity-2hrs.-33min

8, 88,888, 8888 Hz Healing Frequency Music - in this meditation let yourself be drawn into the healing and creative frequency of the overflowing, infinite abundance. Connection with the creative source, the everlasting love of god's universal creation. The number 8 (also known as the infinity sign) is also associated with the base chakra (Muladhara Chakra).

The root chakra is attributed to the element of earth and matter and this is where the root of creation lies. Activating the first chakra strengthens your stability and sense of security in life - abundance, wealth and self-confidence.

The 8 Hz corresponds to the fundamental C and is the transition from theta waves to alpha waves. The 8 Hz in connection with the 88 Hz was generated as binaural beats. Repeating numbers like 88 or 888 are known as angel numbers.

Angel numbers are considered to be a sign from the divine, a potent source of energy. Angel number 8 reveals that life will be filled with happiness and joy. You are all-encompassing love that penetrates you to the smallest cell. Feel the creative, divine power of the universe feeding you with the golden light of abundance and prosperity. Joy and bliss are expressions of your true nature.

Binaural beats are created when different frequencies are played in on the left and right channels via headphones. The brain stem forms the difference between the two frequencies. These frequencies can have a very positive effect on the brain waves.

The effect of the frequency music is best perceived through headphones. Take some time out, find a comfortable, relaxed position while sitting or lying down, take a few deep breaths and the sound journey can begin.

A-19-432-Hz-320Hz-For-Confidence-Success-Solar-Plexus-All-Chakra-Alignment-Binaural-tuned-10Hz-2hrs.-33min

Summary: Manipura Chakra, or the Solar Plexus Chakra, is the third of the physical chakras and it is here we find our confidence, will power, success, individuality, focus, and outward projections.

Associated with the motivation to take action, and also strongly tied to our intellect, the Manipura chakra has a very important place to help us manifest our desired reality, as well as find our sense of individuation. We often find ourselves with third chakra blockages when we have diminished will power, lack of self-worth and self-confidence, and find ourselves procrastinating or resisting certain tasks. On the opposite end we may be placing too much importance on the egoist self, or are reacting in anger more often than not.

Anger is important and healthy emotion, but to always react in anger, or to constantly feel in a state of "us vs them" mentality can also be a symptom of misaligned third chakra. We can think of the manipura as being our internal flame or fire. We want to tend to it without it burning us up or dying out completely.

This composition contains dual frequencies, the first is the 320 Hz Solar Plexus Chakra frequency.

The second is the 10Hz, for which a binaural was created for this track. It is also associated with the Solar Plexus chakra, but also connected to increasing serotonin release, a feeling of "centering", a decrease in pain, and an increase in our intellectual capacities such as memory retention.

The 10Hz frequency is in high alpha brain range frequency, which is associated with healing, centering, and mind/ body connection. It is only natural given the frequencies of the chakras that the scale be tuned to 432Hz, which I will continue to use for all the videos in the chakra healing series. I recommend using headphones or speakers! Please be mindful that alpha wave frequencies may affect people to varying degrees, I would caution against driving while listening to this composition.

A-20-432-Hz-All-Cosmic-Connections-with-Solfeggio-Frequencies-Enter-the-Light-2hrs.-33min

Whether you're relatively new to soothing sounds or are a seasoned listener, the term 'Solfeggio frequencies' might be entirely new to you.

Solfeggio frequencies refer to specific tones of sound that help with and promote various aspects of body and mind health. These frequencies are reputed to date back to ancient history and said to be the fundamental sounds used in both Western Christianity and Eastern Indian religions, chanted by the Gregorian Monks and in ancient Indian Sanskrit chants.

Physician and researcher, Dr. Joseph Puleo, rediscovered Solfeggio frequencies in the 1970s, bringing their benefits back into public awareness. In his research, he used mathematical numeral reduction to identify six measurable tones that bring the body back into balance and aid in healing.

These Solfeggio frequencies were believed to profoundly affect the conscious and subconscious mind in order to stimulate healing and promote vitality. Thanks to Puleo's work and the renewed interest, many

scientists have since unearthed more evidence supporting the positive effects that these frequencies have on the human body.

The science behind the Solfeggio frequencies

The scientific community began connecting the dots between the type of music played and the variety of physical effects on the human body. In 1988, **biochemist Dr. Glen Rein** made a discovery that confirmed what the ancient spiritual traditions understood when he tested the impact of different music on human DNA.

Rein exposed similar DNA vials to four kinds of music with different frequencies – Gregorian chants, Sanskrit chants, classical, and rock. By measuring the rate of UV light absorption, an essential function of healthy DNA, Rein was able to assess the effects of each type of music. And the results will make you reconsider the type of music you listen to when you want to relax.

The Gregorian and Sanskrit chants had the most positive, even healing, effects by increasing UV light absorption between 5 to 9 percent. The classical music increased UV absorption by small amounts. And rock music decreased UV light absorption, harming the DNA. Rein's research supported the theory that sound frequencies do produce serious effects, for better or worse, on health and well-being.

Since Rein's illuminating discovery, further research has come to light that shows **Solfeggio frequencies have profound mental, emotional, and physical effects**. Additionally, this understanding has led to music therapy becoming established as a health profession to help individuals therapeutically using various aspects of music creation and listening.

However, to understand what's so special about the Solfeggio frequencies and how they differ from other tones, it's first important to understand the Schumann resonance.

One thing is for sure. A person who resonates with love have inner peace – and this is the starting point for a world where we live in Unity, Peace and Harmony with each other and Mother Earth. Modern science has begun to recognize what the ancient mystics and wise men have told us for centuries; that everything is in a constant state of vibration. Everything down to the smallest physical particle to the things we cannot perceive with our (yet) limited senses. The most elemental state of vibration is that of sound. Everything has an optimum range of vibration (frequency), and that rate is called resonance. When we are in resonance, we are in balance. Every organ and every cell in our precious body absorbs and emits sound with particular optimum resonate frequency. 432hz and 528hz tuned music creates resonance in our physical, mental, emotional and spiritual body.

Vic Showell and John Stuart Reid (a pioneer in acoustic research and cymatic measurements) have proven that 528 is essential to the sacred geometry of circles and spirals consistent with DNA structuring and hydrosonic restructuring.

528hz More than any sound previously discovered, the “LOVE frequency” resonates at the heart of everything. It connects your heart, your spiritual essence. The Love frequency is the “Miracle” note of the original Solfeggio musical scale. Listening to the 432Hz frequency resonates inside our body, releases emotional blockages and expands our consciousness. This Soundtrack uses a 432Hz frequency tone mixed with the music (the music itself is in standard tuning). 432Hz allows us to tune into the wisdom of the Universe, Divine Intelligence, and our Soul. It creates Unity instead of separation. It expands our hearts and makes us more compassionate and loving. One thing is for sure.

A person who resonates with love have inner peace – and this is the starting point for a world where we live in Unity, Peace and Harmony with each-other and Mother Earth. Modern science has begun to recognize what the ancient mystics and wise men have told us for centuries; that everything is in a constant state of vibration. Everything down to the smallest physical particle to the things we cannot not perceive with our (yet) limited senses.

The most elemental state of vibration is that of sound. Everything has an optimum range of vibration (frequency), and that rate is called resonance. When we are in resonance, we are in balance. Every organ and every cell in our precious body absorbs and emits sound with particular optimum resonate frequency. 432hz and 528hz tuned music creates resonance in our physical, mental, emotional and spiritual body.

Solfeggio Frequency 285 Hz: heals and regenerates tissues and organs, it is connected to the acceleration of conscious evolution. The original 6 Solfeggio Frequencies were (re)discovered by Dr. Joseph Barber in the Book of Numbers (Chapter 7, verses 12 through 83) and are reputed to be the frequencies used by the Gregorian Monks in their meditative chants. When you start to listen to the

Solfeggio Frequencies, you can find symptoms such as headache, nausea or even body spasms. Do not be alarmed: you are simply "tuning/re-tuning" your system. The 9 Solfeggio Frequencies:

Deep Theta Waves Regeneration 417Hz · Healing Meditation Music Deep Theta Waves Regeneration 417Hz

Theta activity has a frequency of 3.5 to 7.5 Hz and is classed as “slow” activity. It is seen in connection with **creativity, intuition, daydreaming, and fantasizing and is a repository for memories, emotions, sensations.** Theta waves are strong during internal focus, meditation, prayer, and spiritual awareness.

THETA (4-8 Hz)

The next brainwave is theta. Theta activity has a frequency of 3.5 to 7.5 Hz and is classed as “slow” activity. It is seen in connection with creativity, intuition, daydreaming, and fantasizing and is a repository for memories, emotions, and sensations. Theta waves are strong during internal focus, meditation, prayer, and spiritual awareness. It reflects the state between wakefulness and sleep and relates to the subconscious mind. It is abnormal in awake adults but is perfectly normal in children up to 13 years old. It is also normal during sleep.

Theta is believed to reflect activity from the limbic system and hippocampal regions. Theta is observed in anxiety, behavioral activation and behavioral inhibition. When the theta rhythm appears to function normally it mediates and/or promotes adaptive, complex behaviors such as learning and memory. Under unusual emotional circumstances, such as stress or disease states, there may be an imbalance of three major transmitter systems, which results in aberrant behavior. Back to our car example, Theta would be considered 2nd gear. Not as slow as 1st gear (Delta) but still not very fast.

THETA (3.5-7.5 Hz): Distribution: usually regional, may involve many lobes, can be lateralized or diffuse;

Subjective feeling states: intuitive, creative, recall, fantasy, imagery, creative, dreamlike, switching thoughts, drowsy; “oneness”, “knowing”
Associated tasks & behaviors: creative, intuitive; but may also be distracted, unfocused
Physiological correlates: healing, integration of mind/body
Effects of Training: if enhanced, can induce drifting, trance-like state.

If you suppressed, it can improve your concentration and the ability to focus better meaning your attention.

F-11- 432-Hz-936Hz-To-Activate-Your-Pineal-Gland-with-Binaural-beats-3rd-eye-opening-2hrs-33min

POWERFUL Pineal Gland activation with 936Hz solfeggio frequency, Third eye opening with binaural beats meditation music. When you meditate your third eye may show itself to you without you even trying.

However, if you consciously want to see it, you should, during meditation, concentrate on your third eye area (between your brows). However, you should not focus on this area too intensely. You just have to be aware of that area. When you concentrate on your third eye area, you'll start feeling a tingling sensation or a slight pressure/vibration in that area.

This always means that the third eye chakra is awakening, no matter how small pressure/vibration you're experiencing. After some days, or even the same day of you trying to see the third eye, you may start seeing the colors of it. You may straight away become aware of your third eye, but that doesn't happen often. With the opening of your third eye chakra your sixth sense sharpens and you become more in tune with the universe.

Your personal traits may not change much, but you'll have a greater knowledge of this world and others. How to know that you awakened your third eye? You can be assured that your third eye is awakened if you close your eyes and can see: White/blue/purple colours Intense white dots Black sky with numerous stars The shape of the eye/square/circle/some other shape filled with blue or purple colour These are all signs that you've awakened your third eye.

If you feel the pressure or some activity in your third eye chakra, that means that your third eye is being awakened and soon you'll be able to see with it.

How long does it take to open the third eye?

It's not a question of how long it takes to open. That's a relative question. Technically if you think of the third eye seeing potential, actually strangely means the third is never 100% open, We use our main physical senses to see what is real. Rather it's a skill, that a person can refined and develop over an entire lifetime.

What open means is: that a person considers the third eye to be reliable enough that they trust to what they see from it. That measure of trust varies greatly from person to person. It's important never to rush the process of learning the third eye. Don't get lost in all the potential you see with an open third eye.

With patience consolidate your practice into more concise routines. Otherwise in potential ideas will blend together to create something different and misleading. Because we want to validate our third eye is open, people often share raw ideas and visions before they really have had the time to process them properly. When talking with others, slow down and don't overwhelm them with too much all at once otherwise

(1) What you experience gets distorted,

(2) People are pushed away from you to further isolate you

(3) You get frustrated in the break down of communication

(4) Frustration generates conflict and ironically more frustration that then limits your third eye absolutely.

(5) You end up taking it to places further away from a grounded and healthy life. (6) You end up closing your third eye, because you cannot validate the potential you see. Doubts disrupt, dispel and close the third eye very easily. Take the time to explore and be patient so you don't push it too far from reality.

Staying grounded is very important, when people get ungrounded, you lose trust and personal faith quickly. It's fine to be excited, but many people will take your excitement the wrong way since they don't trust their own truth.

So share in a quieter manner and you will find people respond back in a stronger and more positive way. It takes a life time to truly open the third eye.

Patience and modesty allow you to take the time to work with your third eye at its own opening pace.

F-12- 432-Hz-Very-Deep-Theta-Wave-Inducer-A-Pure-Binaural-Beat-6HZ-Interval-Resetting-all-your-chakras-2hrs-33min

NOTE: You will not hear anything without headphones ! A Super Deep Theta Binaural Beat made out of 55 Hz (carrier) at 6Hz Intervals. The perfect wave to enter a state of trance and auto self-induce new concepts to your subconscious mind.

This audio track was produced in a professional recording studio. It was designed to help those who want to meditate, create personal inductions and connect with the superpower of their imagination!

SUGGESTION OF HOW TO USE THIS: In a quiet environment sit back in a comfortable position and let your brain gets in sync with The Theta Wave Pattern. Begin by cleaning up negative thoughts before you

fall into the state of numbness that will eventually kick in. KNOW what you want, imagine it with the feelings of accomplishment and gratitude.

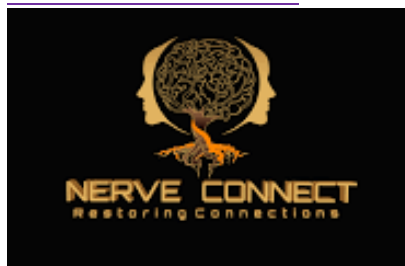

Then, Observe! Listen to this on a daily basis when you meditate with headphones or earphones on your devices to benefit from it. Don't put it too loud! Theta State is a state of very deep relaxation; it is used in hypnosis and during REM sleep. The brain waves are slowed down at a frequency of 4-7 cycles per second. Theta is the first stage of the phase when we dream.
